

What FTS5 stores

Work example

Left path → **text_search** . A block on page 47 of the Slovenian YukonDAK manual:

```
PDF page block:  "Senzor S-304 nadzira raven tekočine v rezervoarju in
pošlje
                  signal v krmilnik PLC ..."
```

↓ extract + filter (prose, passes)

↓ translate (source language = sl) → "Sensor S-304 monitors the
liquid

level in the reservoir and

sends

a signal to the PLC

controller ..."

↓ insert

```
text_search row:
  chunk_id = '3048_BETRIEBSANLEITUNG_YUKONDAK_SI_p047_b03'
  doc_id   = '3048_BETRIEBSANLEITUNG_YUKONDAK_SI'
  page     = 47
  layer    = 'operational'
  text     = 'Senzor S-304 nadzira raven tekočine v rezervoarju ...'
  text_en  = 'Sensor S-304 monitors the liquid level in the reservoir
  ...'
```

Right path → **id_search** . An asset in inventory:

```
display_name = 'Exhaust-air connection callout'
caption      = 'Exhaust-air connection Ø160 / Ø250 on industrial
washing
              machine with customer-supplied reduction ducting'
↓ compose + dedupe tokens
id_search row:
  urn      = 'asset://3048/CAD-162844-AUFSTELLPLAN-3048/IMG-Exhaust-
air-connection-callout'
  layer    = 'energy'
  id_text  = 'exhaust air connection callout ø160 ø250 on industrial
washing
              machine with customer supplied reduction ducting'
```
